

PROBLEM SET A (HOMEWORK 6)

DUE DATE: APRIL 10, 2018

This homework requires you to design solution methodology for the problems mentioned in the list. For each problem, you are required to discuss all the aspects of the problem-solving effort. Each problem solution should not take more than 1-2 typed pages to describe. The solution description should contain: (a) how you store the data, (b) a detailed description of the solution methodology, and (c) a pseudocode of the solution, if needed. The coding effort should be minimal given the description. One submission per team is needed. Please make sure that each member of the team contributes equally to the effort.
